CAREER OBJECTIVE

Full-stack developer specializing in high-performance web applications with advanced 3D interactions and animations. Experienced in delivering scalable solutions for international clients across 5 countries (Canada, UAE, Jordan, USA, Australia) using the MERN stack, Next.js, and Three.js. Strong track record of building production-ready applications that combine technical sophistication with exceptional user experiences.

Technical Skills

Core Technologies: React, Next.js, Node.js, Express, MongoDB, JavaScript (ES6+), TypeScript

Specializations: Three.js, GSAP Animations, 3D Web Graphics, Interactive UI/UX

Front-end: HTML5, CSS3, Tailwind CSS, React Native, Figma

Backend & Database: RESTful APIs, PostgreSQL, Mongoose, Postman

DevOps & Tools: Git, AWS, Vercel, Render, CI/CD Pipelines

Integrations: Stripe, PayPal, JWT Authentication, Payment Gateways

Others: Python, WordPress, Agile/SDLC,

Experience

Freelancer Full Stack Developer

Full Stack Web Development Freelancer

5/2024 – Present

Work Experiences:

- Delivered 15+ production websites for clients across Canada, UAE, Jordan, USA, and Australia spanning fintech, e-commerce, hospitality, and legal industries
- Architected and deployed CalculateYourRefund.com, processing 200+ tax calculations daily with 99.5% calculation accuracy using Next.js, Node.js, and MongoDB
- Built Royal Delta Group corporate platform featuring advanced Three.js 3D animations and GSAP scroll-triggered interactions, achieving 95+ Lighthouse performance score.
- Developed Topaz Technology VPS hosting website with custom 3D server visualization and real-time pricing engine
- Engineered responsive e-commerce platforms with integrated payment gateways (Stripe/PayPal) and inventory management systems
- Maintained 100% client satisfaction rate through clear communication, on-time delivery, and post-launch support across multiple time zones.

Trainee at Coding Academy by Orange

Full Stack Web Development Trainee

5/2024 – 12/2024

Work Experiences:

- **HTML/CSS/JavaScript:** Mastery of core front-end technologies for building responsive and interactive web interfaces.
- **React.js:** Proficiency in creating dynamic, component-based user interfaces and managing state with hooks.

- **Node.js:** Backend development experience using JavaScript, handling server-side logic, and building APIs.
- **Express.js:** Framework for building robust and scalable RESTful APIs, managing middleware, and routing.
- **MongoDB:** Working with NoSQL databases, performing CRUD operations, and handling database schema design.
- **Authentication & Authorization:** Implemented user authentication systems using JWT, bcrypt.
- **Full-Stack Projects:** Built 10 full-stack applications, integrating front-end and back-end technologies seamlessly.
- **Version Control:** Used Git for source control and GitHub for collaboration and project management.
- **Agile Methodology:** Experience working with Agile principles and tools like Trello for project management.

Featured Projects

CalculateYourRefund.com | Tax Filing Automation Platform

Solo Developer | Live: <https://calculateyourrefund.com/> | Tech: Next.js, Node.js, MongoDB, Stripe

Automated tax refund calculation platform serving Canadian taxpayers with real-time processing and professional advisor integration.

- Engineered secure authentication system protecting financial data for 500+ registered users with JWT and bcrypt encryption
- Implemented tax calculation engine processing CRA forms with high accuracy validated against manual calculations
- Designed RESTful API handling 200+ daily handled concurrent user traffic with optimized API performance
- Integrated Stripe payment gateway for seamless professional tax service purchases
- Achieved 92 Lighthouse performance score through Next.js SSR optimization and lazy loading

Dolce e Luce Salon | Beauty Salon Booking Platform

Solo Developer | Live: <https://www.dolceelucesalon.com/> | Client: USA

Tech Stack: Next, Node.js, MongoDB, Stripe

Full-service beauty salon website featuring online booking system, service catalog, and payment processing for upscale clientele.

- Developed real-time appointment booking system with calendar integration and automated email confirmations
- Built dynamic service menu with pricing calculator, package deals, and stylist selection functionality
- Implemented Stripe payment integration for seamless deposits and prepayments with secure transaction handling
- Created elegant, mobile-responsive UI reflecting luxury brand identity with smooth animations and intuitive navigation

- Integrated admin dashboard for appointment management, client history tracking, and revenue analytics

Mar United | Dead Sea Products E-Commerce

Solo Developer | Live: <https://www.mar-united.ae/> | Client: UAE

Tech Stack: React, Node.js, MongoDB, PayPal, Stripe

E-commerce platform for premium Dead Sea cosmetics and wellness products targeting Middle Eastern and European markets.

- Architected full-stack e-commerce solution with product catalog, shopping cart, and secure checkout workflow
- Implemented dual payment gateway integration (PayPal + Stripe) supporting multiple currencies (AED, USD, EUR) with real-time conversion rates
- Built inventory management system with real-time stock tracking and automated low-stock notifications
- Designed **trilingual interface (English/Arabic/Spanish)** with RTL support for Arabic, ensuring seamless experience for diverse customer base across UAE, Europe, and Latin America
- Created admin panel for order processing, customer management, and sales analytics with visual dashboards
- Optimized product image loading reducing page load time by 65% while maintaining high-resolution gallery quality
- Implemented internationalization (i18n) with dynamic content switching and localized product descriptions

SHAAS Consulting | AI-Powered Business Solutions Platform

Solo Developer | Live: <https://www.shaas-consulting.ae/> | Client: UAE

Tech Stack: React, Node.js, Three.js, OpenAI API Integration

Corporate consulting platform featuring AI-driven business intelligence tools and interactive data visualization.

- Integrated OpenAI API for automated business analysis and recommendation generation based on client input
- Developed interactive 3D data visualizations using Three.js for presenting complex business metrics
- Built responsive dashboard with real-time analytics and customizable reporting features
- Implemented secure client portal with role-based access control for confidential business data
- Created modular AI prompt engineering system allowing customization for different consulting services
- Currently in development with planned features including predictive analytics and market trend analysis

Education

Coding Academy by Orange Full-Stack Web Development Bootcamp

05/2024 – 12/2024

Intensive course in Full-Stack Web Development in collaboration with Simplon.co and Princess Sumaya University for Technology (PSUT)

Bachelor of Civil Engineering 2017-2022

The Hashemite University

Accredited by the Accreditation Board for Engineering and Technology (ABET)
